Suitability control with respect to the users of the autotrading service aims at drawing conclusions on:

- The suitability of the financial instruments accessed through the Platform to the specific investor.
- The suitability of the autotrading service as regards the specific investor (in the sense of being compatible with his investment objectives and configuration of tolerable risk limits for the protection of the account).

It is of utmost importance for the proper provision of services to the Client, to fill in the options that describe accurately the Client’s real situation.
